[See more](#)

Economics and Finance is an international undergraduate degree course entirely taught in English.

Its goal is to provide the **quantitative and qualitative tools** to analyse modern economic and financial systems, which are nowadays complex and interwoven, well beyond national boundaries.

On completion of the programme, students will learn and **practice economic reasoning tools** to formulate and evaluate **economic advice and policy**, for both the private and the public sector.

### The course in numbers

**66%** International students and students not residing in the region

**74%** Graduates aligned to the course schedule
